

Exhibit 14.

Tabulation of Injuries Reported in the Accident^{379, 380}

#	Meth Arv	Gender Age	Arv Date	Arv~ Time	Presenting Complaint ³⁸¹ / Notes	Disch Disp	Inj Crit
1	W	F 50	11/1	13:50	stressed over event; NMR/NFT	d/h	m
2	W	F 82	11/1	15:30	stressed over event; slightly elevated BP; NFT	d/h	m
3	W	F 84	11/1	16:00	NSC/PE; NMR/NFT	d/h	m
4	W	F 34	11/1	22:00	NSC/PE; NMR/NFT	d/h	m
5	W	F 84	11/1	22:00	NSC/PE; NMR/NFT	d/h	m
6	W	M 42	11/1	----	minor arm abrasion [Note 1]; T&R [Note 2]	d/h	m
7	W	M 62	11/2	14:15	low back pain [Note 3]; NMR/NFT	d/h	m

Tabulation injury count total: 7 (all civilians)

Notes:

- [1] Pt reported [to Safety Board staff] he fell while running from [evading] the fire, which had engulfed the area near his location, resulting in a minor arm abrasion injury.
- [2] although this individual voluntarily provided this information to the investigation (during an interview by NTSB staff), in which also personally identifiable information of the witness is not reported herein [this document], the medical facility (referenced by this individual) declined to provide a confirmation of this information due to what the medical facility indicated was a consideration of HIPAA regulations, in which also, due to the minor nature of the reported injury, NTSB staff elected not to further pursue confirmation from this medical facility, in which also no reason has been observed to challenge the testimony of the witness.
- [3] Pt reported [to the medical staff] he fell in the woods while running from [evading] the explosion / fire, resulting in a possible [suspected] back injury.

Nomenclature / abbreviations / definitions used in this Table

= data sequence number
 ~ approximately
 11/1, 2 November 1, or 2, 2007
 Age [in years]

³⁷⁹ ref. § 8.4 of this report.

³⁸⁰ Note - in this particular investigation, all the reported injuries were “minor” in severity, in which, accordingly, NTSB on-scene staff made the determination that it was not necessary to gain full access to confidential medical record data in order to identify the degree of injury severity, in which also NTSB on-scene staff consulted with the professional medical staff at the various medical facilities utilized in the event in order to identify the data presented in this tabulation, in which also documentation of the medical facilities referenced herein was sanitized of, and NTSB staff did not gain access to, personally identifiable confidential medical record information (ref. US Dept. of Health & Human Services / HIPAA regulations; Public Law 104-191).

³⁸¹ narrative cited is quoted substantially verbatim from the [sanitized] data received from the responding medical facilities, or other credible information sources.

Arv	arrival at medical facility
BP	blood pressure
d/h	discharged to home
Disch	discharge
Disp	disposition
F	female
Inj Crit	Injury Criteria ³⁸²
m	minor [Injury Criteria]
M	male
Meth	method [of arrival; ambulance or walk-in]
NFT	Pt was released with no further medical treatment prescribed
NMR	Pt was evaluated, where normal medical readings were observed
NSC/PE	Pt presented with no specific complaint, requesting that a “precautionary medical examination” be performed to help assure no injury was sustained.
Pt	patient
T&R	Pt was treated and released without medical complication
W	walk-in (self-transport)
